Hi Gary,

Sorry it has taken so long, I sent this yesterday, but looks like it did not go through from my personal email.

The November 13, 2013 reading was incomplete, I did not put in the calculations. The Maximum reading was 55, minimum was 0. The total over 20% was 6 readings. My ending time was 12:35PM. We were having trouble with the dryers on this day, the load was minimal at this time because of a dryer plug up.

Any other questions, feel free to call me @ (509)322-7348

Thanks,

Connie Chaney
